# PRODUCT OVERVIEW

Aluminum Profile "**S2**" is a surface mounted aluminum housing for LED strips that comes with a squared lens (compare with "**S1**" which has a rounded lens). It features a unique track mounting system which allows you to install the profile, conceal wire, and snap it into place with no visible mounting hardware. Aluminum Profile "**S2**" can accommodate any high-output LED strip up to 0.66" (16.8mm) wide, while drawing out excess heat from your LED strips extending their lifetime. The compact and slim design of "**S2**" makes it an ideal solution for task, shelf, and high-output cabinet lighting applications. Create DOTLESS LED lighting when you select a white lens and use one of our high-density DOTLESS LED strips. Aluminum Profile "**S2**" is conveniently sold in 6.5ft lengths as a completed kit including a pair of end-caps, mounting track, and one squared clear or white lens.

## Features

- Unique, Compact, Squared Lens Design.
- **DOTLESS** when used with our high-density LED strips.
- Cuttable with any standard miter saw.
- Maximizes Lifetime of LED strips by dissipating heat.
- Easy to install with included mounting track.
- High output strips with a narrow channel.
