

PRODUCT OVERVIEW

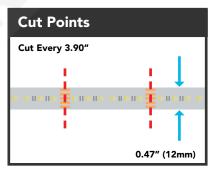

Designed to handle high quality and vivid color changing lighting needs, our 24V RGBC\$5060W LED strip allows you to create long lasting, headache-free lighting right out of the package. Easily cut, peel, and stick the flexible light tape to your mounting surface using the durable and permanent 3M® adhesive backing. This LED strip features 4-in-1 high quality chips that allow for vivid color capabilities when used with one of our RGBW controllers. Achieve well over 50,000 hours of useful lighting when used with one of our aluminum profiles for LED strips to draw out the heat and protect the strips from damaging elements, as well as creating a more diffused and DOTLESS finish on your fixture. Our 24V RGB **CS506W** LED Tape comes with the UL-stamp of approval and is **UL-listed** for use in both the United States and Canada (cUL).

The 24V RGB CS5060 LED Strip comes in a 16'5" roll/reel and is 0.47" (12mm) wide. 5050 LED chips are mounted on a flexible PCB every **0.63"** apart. The full LED strip spool has about 300 LED chips packed in a low-density—18 LED/ft (60/M)—configuration. The LED strip comes with (1) 6" 18-5 wire lead with bare, tin-coated ends, for fast and reliable wire-to-wire connections. This LED Strip consumes an average of 5.5 Watts/ft. Effortlessly cut this LED strip every 3.90" (or every 6 LED chips).

| Strip Specifications *[XX] denotes color temperature | |
|--|-----------------------------|
| Part# | 24VCS5060RGBXW* |
| Roll Length | 16′5″ (197″) |
| Input Voltage | 24VDC |
| Strip Width | 0.47" (12mm) |
| Cut Increments | Cuttable every 3.90" |
| Color Rendering | N/A |
| LED Type | 5050 |
| LED Density | 18 LEDs per foot (60/M) |
| Wattage | 5.5 Watts/ft |
| Light Output | N/A |
| Efficiency | N/A |
| Lifetime | 50,000 Hours (Average) |
| Warranty | 3-Year Limited Warranty |
| IP-Rating | IP-23 (For Indoor Use Only) |
| Listings | UL-Listed (US and Canada) |

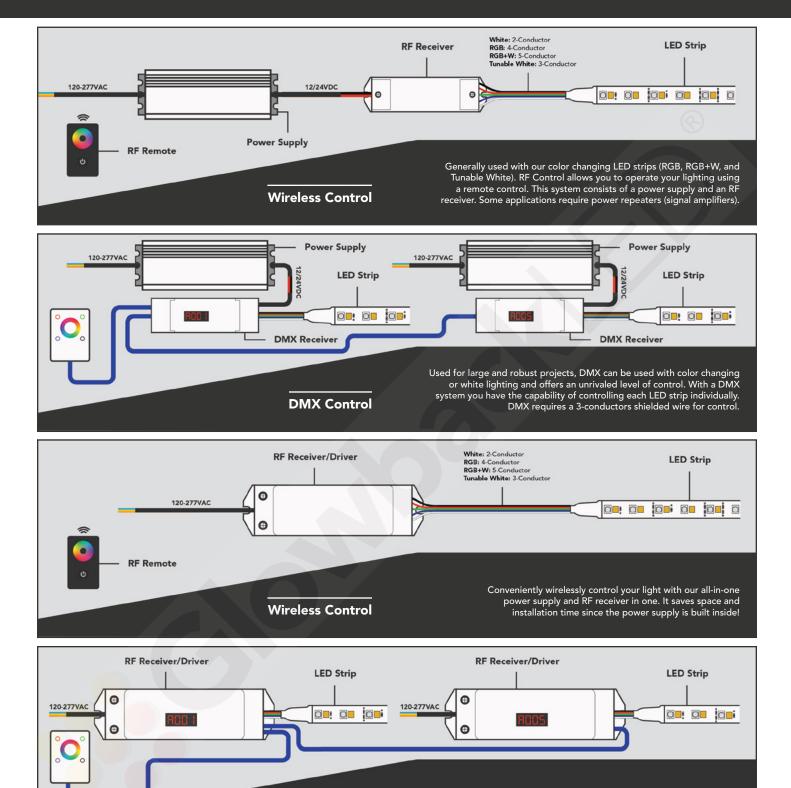

Features

- Select from our wide variety of control options to achieve millions of true vivid colors!
- High-Quality LED Strip! Excellent thermal management for lasting installations.
- **UL-Listed!** (in US and Canada) Specify our strips on any commercial project!
- Two Different White Color Temperature options: RGB+3000K White, or RGB+6500K White.

All of our LED Panels require a remote power supply and/or controller to operate. Seamlessly integrate our LED Panel systems with any type of home or building automation system. Unless otherwise specified, all LED Panel systems, including power supplies and controllers are shipped to you pre-configured, to facilitate installation. Power-Supplies will come "rigged" with connectors to match the connectors coming off the LED panels. When ordering, simply give us some details about the level of control that you want, and our team will design a turn-key control system fit to meet your needs.

DMX Control

Conveniently DMX control your strip lights with our all-in-one power supply and DMX receiver in one. It saves space and

installation time since the power supply is built inside!
