

PRODUCT OVERVIEW

Aluminum Profile "I" is a low-profile, corner mounted extrusion for low-medium output LED ribbon. It is a popular solution for under-cabinet lighting, and in-cabinett lighting. Inside of cabinets, it can be installed along vertical framing to clearly illuminate items within the cabinet. Aluminum Profile "I" maximizes the lifetime of your LED strips by extracting excess heat. Aluminum Profile "I" can accommodate any LED strip up to 10.3mm (0.41") wide. Aluminum Profile "I" is conveniently sold in **8ft lengths** as a **completed kit** including one pair of end caps and a choice of one premium UV resistant **clear or frosted** diffuser (lens).
