

PRODUCT OVERVIEW

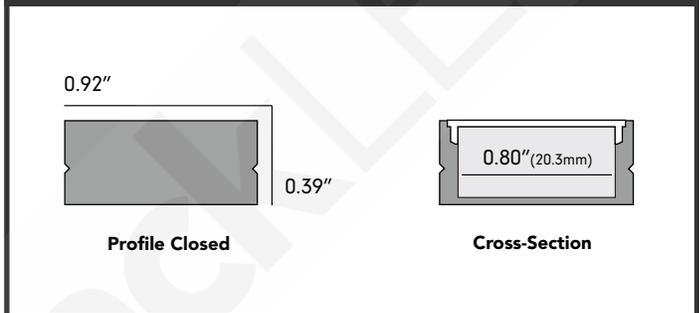

Aluminum Profile "O" is one of our most popular surface-mounted Aluminum channels for LED strip lighting. It features a wide but shallow design, making it a popular solution for wider strips, particularly RGBW LED tape and waterproof LED strips (usually wider). Aluminum Profile "O" can accommodate any LED strip up to 20.3mm (0.80") and is only 0.39" deep (high). The high-quality aluminum extrusion increases the longevity of any LED tape by dissipating heat. Aluminum Profile "O" is conveniently stocked in 8ft lengths and is sold as a completed kit including one pair of endcaps, mounting clips, and a frosted UV-resistant diffuser (lens).

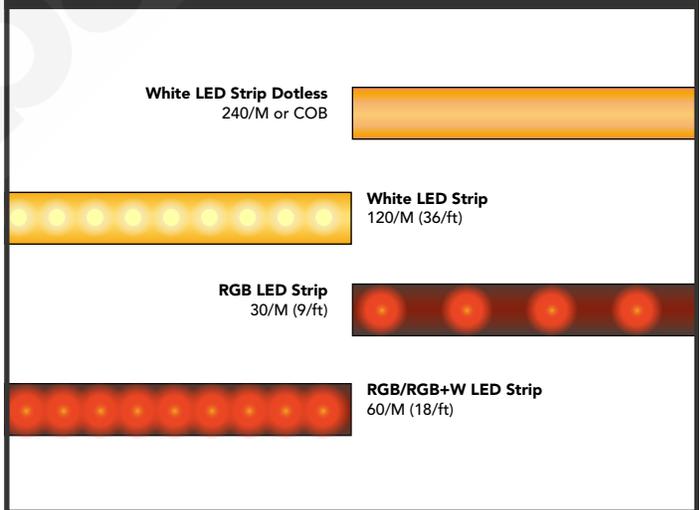

Specifications

Part#	ALUMO-96
Length	8ft (94" for free shipping*)
Width	0.92" (23.4mm)
Height	0.39" (9.91mm)
Lens Type	Frosted
MAX Light	3 Watts/ft (recommended)
MAX Strip Size	0.80" (20.3mm)

Dimensions

Dots

Features

- Wide and Shallow Design! Use with quickconnectors, double-row LED strips, and wider RGBW LEDs.
- 0.39" depth allows it to be easily concealed under-cabinets, in landscaping, and in coves.
- High Quality Aluminum alloy extends lifetime of LEDs by extracting heat.
- Cuttable with any standard miter saw.
