

Product Overview

BG-2819S LED Controller Spec Sheet

Our **BG-2819S** RGBW Remote Controller, is a dependable and durable option to wirelessly control **up to 4 Zones** of Color Changing RGB or Color Changing and White (RGB+W) LED Strip lighting separately, or in unison. Easily create thousands of vivid custom colors using the responsive color wheel, while also adjusting the level of white light being displayed using the according buttons. This controller allows you to save up to 3 custom color scenes, and choose from 10 different built in color chasing dynamic modes. Our 4-Zone OMNI RF RGB/RGBW Remote must be used with one of our compatible OMNI RF receiver in order to function. **UL-Listed**, use this controller on any of your RGB/W LED lighting projects. In case of a power outage, or when power is turned off, this LED controller will remember the previous settings. With simple pairing and robust control, this LED Controller is a reliable option.
